SLEEVE / CASING INSTRUCTIONS

A sleeve or casing is the most practical way to prepare a quilt for hanging without damaging the quilt in any way. It is perhaps the simplest and most effective method because a rod can be inserted and suspended between standards. To make a sleeve or casing:

- A. **Cut a strip 9" wide and 1" longer than the top of your quilt. Finish the ends by turning the raw edges of each end toward the wrong side approximately 1/4"; then turn under again stitching in place by hand or machine.**
- B. Fold the strip in half, lengthwise, right sides together and stitch, using 1/2" seam allowance.
- C. Press the sleeve so that the seam is centered on the back of the sleeve.
- D. The sleeve is stitched to the back of the quilt with the seam to the outside lessening abrasion to the quilt and ensuring a flat surface next to the quilt while it hangs.
- E. Hand-stitch the sleeve across the top backside of the quilt. Place the sleeve just under the binding (or approximately 1/2" from the top edge of the quilt). Stitch through ALL layers, using 1/4" stitches on the front of the quilt and 1/2" to 3/4" stitches on the backside. The stitches should go through all layers of the quilt so there will be less strain on the quilt. The 1/4" stitches on the front will not show or will show so little that they will not be seen from exhibiting distance, especially if you use a neutral or coordinating thread color.
- F. Begin stitching in the center of the quilt and work out to one side. Repeat from the center out to the other side. Repeat for the bottom edge of the sleeve/casing.
